

Happy Tails. Soft paws, sharp care.

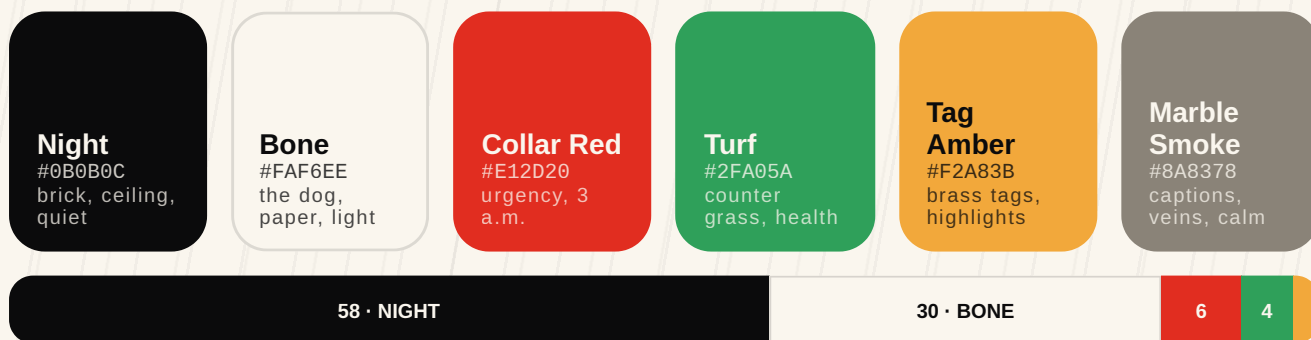

A pet store and 24/7 clinic in G-10 Markaz, Islamabad. This book defines the soft system: fur textures, one hand-drawn swiggle, six colors, and nothing sharp.

Happy Tails Pet Store and Clinic

Plot 14-B Ramna Plaza, Bela Rd, G-10 Markaz

01 · THE PALETTE

Six colors. Night owns the room, bone catches the light.

The mix is per screen, not per element: mostly night, generous bone, and red only where a heart beats faster. Amber and smoke are seasoning, never surfaces.

The rules live here, not in opinions. WCAG 2.1.

PAIRING	RATIO	VERDICT	USE
Bone on Night	17.9	AAA ✓	Body text on dark
Amber on Night	9.8	AAA ✓	Accents, prices, labels on dark
Turf on Night	5.9	AA ✓	Buttons, confirmations on dark
Smoke on Night	5.2	AA ✓	Captions on dark
Red on Night	4.3	AA-LARGE	≥24px or 19px bold only
Red on Bone	4.2	AA-LARGE	≥24px or 19px bold only
Smoke on Bone	3.5	AA-LARGE	≥24px or 19px bold only
Turf on Bone	3.1	AA-LARGE	Big buttons and graphics

WORDMARK CONSTRUCTION

Happy **Tails**

"Happy" set in Baloo 2 ExtraBold. "Tails" is the client's own script lettering, vectorized from the original art. Collar-red underline bar optional.

CLEAR SPACE AND MINIMUMS

Keep clear space equal to the height of the dog's ear on all sides. The mark never sits smaller than 28px tall on screens. The full lockup never under 140px wide. On photos, use the night sticker version or drop a soft shadow.

Everything here has a coat.

FUR TEXTURE

Directional 1.5px strokes at 100°, two layers offset by half a cell, 4% opacity. Day fur on bone, night fur on night. It backgrounds sections; it never sits under body paragraphs busier than captions.

MOTION MANNERS

- Paw-print trail follows the cursor at a walking gait, fades in a second.
- Cards lift 4px and tilt a third of a degree. No bouncing.
- Photos sway $\pm 1.2^\circ$ over six seconds when idle. Nothing else breathes on a grid.
- Respect prefers-reduced-motion: all of it switches off.

THE SWIGGLE

One hand-drawn line that leans toward the mouse and settles when it stops. Amber by default, turf for confirmations. It underlines headlines and section titles. One per viewport at rest; it is a wink, not a wallpaper.

NEVER

- No gradients, no glass blur panels, no neon glow.
- No sharp corners. Radius lives at 1.5 to 2rem, pills at 999px.
- No hard offset shadows; shadows are soft, night-tinted, low.
- No amber text on bone. It fails at 1.9 and it always will.

Round faces, warm sentences.

VOICE

- Warm and concrete. "Two left" means two left.
- Urdu greetings welcome; English carries the facts.
- Prices and hours are copy, not fine print.
- Emergency language stays calm. Red is for the collar, the CTA, 3 a.m.
